Supervised by: -

Mrs. Chinta Indira Devi

1).ACKNOWLEDGEMENT

I would like to express my sincere gratitude to our respected faculty and institution for providing the opportunity to develop the project titled **"Student Project Submission System"** as part of the Full Stack Development course.

I am thankful to my project guide for their valuable guidance, continuous support, and encouragement throughout the development of this project. Their suggestions helped me to complete this project successfully within the given time frame.

We also thank all faculty members for providing the necessary resources and guidance.

I also thank my classmates and friends for their cooperation and support during the implementation of this system.

Finally, I would like to thank my family for their constant encouragement and motivation.

3. PROJECT DETAILS

Project Title:

Student Project Submission System

Technology Used:

Frontend:

- React.js
- HTML
- CSS
- JavaScript

Backend / Services:

- Firebase Authentication
- Firebase Firestore Database
- Firebase Storage

Deployment Platform:

- Netlify

Tools Used:

- Visual Studio Code
- Firebase Console
- GitHub / Netlify

Project Type:

Full Stack Web Application

4. PROJECT DESCRIPTION

The **Student Project Submission System** is a web-based application developed using modern web technologies to simplify the process of submitting and managing student projects.

This system allows students to register, log in, upload their project files, and manage their submissions. It also provides an administrative interface where teachers or administrators can review submitted projects, approve or reject them, and manage records efficiently.

The system uses **Firebase** as the backend service for authentication, database management, and file storage. The application is deployed on **Netlify**, making it accessible from any device including mobile phones.

The main objective of this project is to automate project submission and reduce manual work in academic institutions.

5. FEATURES

Student Module

Student can:

- Register account
 - Login to system
 - Upload project files
 - View submitted projects
 - Update project
 - Delete project
 - Logout
-

Admin Module

Admin can:

- Login to system
 - View all student submissions
 - Approve project
 - Reject project
 - Download files
 - Delete records
-

Security Features

- User authentication

- Role-based access control
- Password protection
- Secure file storage

6. IMPLEMENTATION

The system is implemented using the **React.js framework** for the frontend interface and **Firebase services** for backend functionality.

Frontend Implementation

The user interface is developed using:

- React components
- Form validation
- Navigation system
- Responsive design

7. Backend Implementation

Firebase provides:

Authentication:

Used for:

- User registration
- Login
- Password reset

Firestore Database:

Used for:

- Storing user information
- Storing project details

Storage:

Used for:

- Uploading project files

8. WORKING SCREENS

Step-by-step process:

1. User opens the website
2. User registers account
3. User logs into system
4. Student uploads project file
5. Project data is stored in database
6. Admin reviews submitted project
7. Admin approves or rejects project
8. Student views project status

System Flow:

Signup

→ Login

→ Student Dashboard

→ Upload Project

→ Admin Review

Actual Screenshots of the site:

The image displays three screenshots of a web application titled "Student Project Submission". The application is described as "Firebase-powered student and admin experience".

The first screenshot (left) shows the "Create your account and start submitting projects." form. It includes input fields for Name (Naveena R), Email (rajendranaveen469@gmail.com), Password (masked with dots), Roll Number (24BTCE232), and Department (Engineering). A "Signup" button is at the bottom.

The second screenshot (middle) shows the same form with the "Email" field highlighted.

The third screenshot (right) shows the "Enter your account information to continue." form. It includes input fields for Email (rajendranaveen469@gmail.com) and Password (masked with dots). Below the password field is a "Signing in..." button. At the bottom, there are links for "Forgot Password?" and "Need an account? Signup".

Upload your project and manage your submissions.

→ Admin

Data Flow:

Student sends:

- Registration data
- Login credentials
- Project files

System processes:

- Authentication
- Data storage
- Project management

Admin receives:

- Project submissions
- Project status

Level 1 (Detailed Flow):

Student:

Signup

→ Login

→ Upload Project

→ View Project

System:

Store data

→ Validate user

→ Manage records

Admin:

View submissions

→ Approve or reject project

10. SUMMARY / CONCLUSION

The Student Project Submission System successfully demonstrates the implementation of a full-stack web application using modern technologies.

The system provides an efficient and user-friendly platform for managing student project submissions. It reduces manual work, improves accuracy, and ensures secure data management.

The project helped in understanding concepts such as:

- Web application development
- Authentication systems
- Database integration
- File storage
- Deployment

This system can be further enhanced by adding features such as:

- Email notifications
- Project deadline reminders
- Advanced reporting system
